

**C-1554**

# C-1554

The Terex Finlay C-1554 is the highest capacity machine in the current range of cone crushers. The plant has been specifically developed for quarry operators, construction companies or contractors producing large volumes of aggregates. The plant can accept an all in feed from a primary crusher, excavator or shovel to provide high reduction ratios and produce a product with excellent cubicity.

## Features:

- Terex MVP 450X cone crushers provides high reduction and productivity ratios and gives excellent product cubicity.
- Hydraulic powered threaded upper assembly for quick crusher setting adjustment under load.
- Hydro-pneumatic tramp iron relief system instantly resets crusher setting after passing uncrushable material and also provides 6" (152 mm) lift for easy clearing of jammed feed material.

## Transport Dimensions

## Working Dimensions

Machine Weight: 61,000kg (134,482lbs)  
(With optional hopper extensions)
