

**WACKER
NEUSON**

The new light balloon modular system: Individually configurable for your applications.

**WIND STABLE
IN OPERATING
CONDITIONS
UP TO 100 KM/H***

The practical modular system offers you the possibility to choose all components tailored to your needs. So you only pay for what you really need.

Select your components:

- 2 light balloons with glare-free light. Optionally with metal vapor halogen lamps (HQI) or halogen lamps.
- 2 tripods: Optionally with a light source height of 3.4 or 5 meters.
- Attractive accessories for more comfort during transport and set-up.
- A generator for electric power supply, when no plug receptacle is available.

Reliably provides a power supply
for flicker-free light.

* The stability values named assume a secure positioning of the light balloon on solid, level ground and a constant wind direction.

You have the choice: Flexible system for unlimited application areas.
